

IDL Automatic Weeding Plan

Required Settings

All IDL members are required to put in place an automatic weeding plan with the settings described below. This is very important to maintaining the health of our consortium, as it helps to prevent "ghost holds" on titles that have no available copies.

To set up your weeding plan:

1. Go to Marketplace → Admin → Weeding → Edit Plan (or Create Plan).
2. Under "Holdings", select "Weed all expired titles"
3. Under "Collection development policies", ensure *nothing* is selected
4. Under "User demand", ensure *nothing* is selected.
5. Click Save.

Holdings

* Which expired titles do you want to weed?

Weed all expired titles

Weed only expired titles that are shared through Advantage Plus

Weed expired titles by Metered Access lending model

Collection development policies

Only weed titles that are no longer available for purchase in Marketplace.

User demand

Only weed titles with 0 holds.
